Welcome to the world of TETCO Geothermal Products
Together we'll make good things happen!

TETCO Geothermal Products are marketed exclusively by Edwards Engineering Corp. of Pompton Plains, New Jersey USA. These products absorb or reject heat to or from the earth by using either ground water or a closed loop heat exchanger.

For heating, cooling or water heating, it's simple...the system that costs the least to operate is the best investment, both today, and into our energy and environmentally conscious future. Geothermal energy works, day and night, hot or cold...and **TETCO** products are **GEOTHERMAL**. EDWARDS ENGINEERING CORP. is the proven leader in earth energy technology.

Information about other fine Edwards Engineering products is available at www.edwards-eng.com.
